METAL ARTICLE WITH FINE UNIFORM STRUCTURES AND  
TEXTURES AND PROCESS OF MAKING SAME

5

ABSTRACT OF THE INVENTION:

Described is the production of a metal article with fine  
metallurgical structure and texture by a process that includes  
forging and rolling and control of the forging and rolling  
10 conditions. Also described is a metal article with a minimum  
of statically crystallized grain size and a uniform (100)  
cubic texture.
